John Park

linkedin.com/in/johntaeheepark/en

Language

HTML, CSS, JavaScript

SQL, C#, .NET

Framework/ Library

Node.js, Express, React.js, React-Native, jQuery,

Mongoose, MongoDB, ASP.NET Core, Entity Framework Core

Bootstrap/Bulma, Git/GitHub, Web API

Work Experience

Glidewell Laboratories Full Stack Developer

2018-Present

JohntPark

- Performed in agile/scrum environment, operating with two sprints, for both frontend and backend
- Developed in-house mapping inventory for administration team using React.js
- Implemented Redux as state management tool to normalize React.js frontend data flow
- Constructed database for administrative products and countries using Node.js/Express and MongoDB
- Utilized source and version control with team of four using Git/GitHub

Redwood Code Academy Full Stack Developer

2018-2018

- Developed multiple full stack applications using various technologies such as React.js, Node.js, and C#
- Created full stack web application generating random restaurant/activity to participate using GraphQL and React.js
- Developed mobile iOS application that allows game user to track his/her statistics on Fortnite using React Native
- Created full stack web application that searches for a tutor near the area using React.js, Redux, and Node.js

Tesla, Inc.
Product Specialist/Owner Advisor

2016-2018

- Worked with Salesforce database to understand data structure and how this may improve customer relations
- Worked with Tesla database to understand data model to search specific trim, color, model, location, etc.
- Achieved being top 5 Owner Advisors in California and top 10% in North America in 2nd quarter of 2018

Projects

Let Us Choose

Web Developer

- Web application used with React.js to automatically generate random restaurant/activity to participate
- Retrieved data for restaurants/activities through Yelp API with GraphQL (backend) and Axios (frontend)

ProjectFortnite

Lead Producer

- iOS application developed with React Native to generate player's stats, current and all-time (PSN, XBOX, PC)
- Implemented API call of each player using Axios and Fortnite Database API for single season and all-time ranking

Find Tutor

Software Engineer

- Web application using React.js and Redux to help students find a tutor around their location with their given field
- Designed own backend database of tutors/field through using Node.is, MongoDB, and Express

ducation

University of California, Irvine

Business Economics
